Introduction

Missouri Care Options (MCO) was implemented five years ago by the Department of Social Services/Division of Aging. The program works to:

- ◆ inform individuals of available long-term care options;
- ◆ promote quality long-term care in a home or community setting;
- ◆ moderate the growth of state funded nursing facility placements by assessing the viability of state funded care in a home or community setting; and
- ◆ enhance the integrity, independence and safety of Missouri's older adults.

The Central Registry Unit (toll-free hotline 1-800-392-0210), operated by the Division of Aging, is the clearinghouse for receipt of screening referrals. Upon completion of the screening process, an individual is determined to be MCO eligible if the individual:

- ◆ is considering state funded long-term care;
- ◆ has low-level maintenance health care needs but is "medically eligible" for nursing facility care;
- ◆ could reasonably have care needs met outside a nursing facility; and
- ◆ receives Medicaid funded long-term care in a home or community setting.

The purpose of this report is to present a summary of the MCO referral and screening process and the associated costs of providing long-term care to MCO clients during fiscal year 1998.

Nursing Facility Cost Avoidance

In fiscal year 1998, it is estimated that almost \$185 million in nursing facility costs were avoided as a result of increased use of alternatives to facility-based long term care. Of the total cost avoidance, the state share was 31 percent (\$57 million) and the federal share was 69 percent (\$127 million). Nursing facility cost avoidance is estimated by subtracting the actual service costs for MCO clients in a home or community setting from the costs of a Medicaid nursing facility* for the same number of days.

** Total cost avoidance has been adjusted for Supplemental Nursing Care cash grants received by residential care facility (RCF) personal care recipients.

*** Total for fiscal years 1995 through 1998 has been adjusted for the Federal Reimbursement Allowance. In 1994 the Missouri legislature enacted the "nursing facility reimbursement allowance" program, which imposed an annual fee on all privately owned nursing facilities. The purpose of this fee was to generate additional revenue to provide for increased Medicaid reimbursement to nursing homes. (Reference RSMo 198.401-198.439.)

Over two-thirds of the nursing facility cost avoidance in fiscal year 1998 resulted from providing care in a home or community setting. The remaining one-third resulted from residential care facility (RCF) residents receiving personal care as an alternative to higher cost settings.

Costs of Providing Services to MCO Clients at Home or in an RCF

Over \$64.5 million was spent providing services to persons residing at home or in the community and personal care services to RCF residents during fiscal year 1998. Of that total, the state share was 53 percent and the federal share, 47 percent. The number of persons served increased from around 12,000 in fiscal year 1997 to over 15,000 in fiscal year 1998.

FY 1998	\$34,062,983	\$30,454,479	\$64,517,462

Note: General Revenue costs include Supplemental Nursing Care cash grants issued by the state to RCF-personal care recipients.

Of the \$64.5 million total cost, 61 percent paid for home & community services. The remainder was Medicaid costs related to services provided to recipients residing in an RCF and their cash grants issued monthly by the state.

Costs by Service and Funding Source

MCO home & community clients who received a service reimbursed during the fiscal year received over 4.5 million units* of services, averaging 289 annual units per recipient. Over half of recipients received Title XIX (Medicaid) personal care services in their homes; 35 percent received personal care while residing in an RCF. Over 1,500 persons received services funded by General Revenue (GR) and block grants.

** Older Americans Act (OAA) Title III services tracking is based on data entry by Division of Aging staff.

*** Persons may receive more than one of the available home & community services; thus, the number of recipients for each service adds to more than the total.

Title XIX (Medicaid) funded over half of the MCO home & community services during fiscal year 1998. Title XIX funded personal care services in an RCF, accounting for 20 percent of total costs. RCF cash grants (state funds only) accounted for 19 percent, and block grant and General Revenue funds for five percent of service costs. Older Americans Act Title III funds used was \$346,283.

FY 1998 Home & Community MCO Costs by Funding Source

Average Annual Cost Per Recipient

The average annual cost during fiscal year 1998 to provide home & community services to each MCO client “medically eligible” for nursing facility level of care was estimated at \$3,731. For those who received personal care and cash grants in an RCF, the estimated annual cost per recipient was \$4,365. For a nursing facility resident, the average annual cost was estimated at \$31,765, after adjusting for the Federal Reimbursement Allowance. Nursing facility average costs were determined by dividing total expenditures by the average monthly number of recipients; RCF and home & community average costs were determined by dividing total expenditures by total recipients.

Average Annual Cost Per Recipient

Notes: The nursing facility estimate includes costs for some residents who did not have an MCO screening; it also has been adjusted to exclude the Federal Reimbursement Allowance.
The RCF cost includes cash grants.
The methodology used to determine average costs in this report differs from that used in previous fiscal year reports.

Referrals, Screenings and Outcomes

Screenings are required for persons entering nursing facilities who are Medicaid eligible or potentially Medicaid eligible. In fiscal year 1998, almost 24,000 referrals were made to the Central Registry Unit (CRU). Because of an immediate need for nursing facility care, the CRU completed the screenings for 2,746 referrals; Division of Aging social workers screened the remaining referrals.

MCO Referrals			
	<u>Received at the CRU</u>	<u>Screened by the CRU</u>	<u>Screened by DA Field Staff</u>
FY 1994	16,340	4,353	11,987
FY 1995	18,063	4,791	13,272
FY 1996	19,603	4,359	15,244
FY 1997	21,753	3,650	18,103
FY 1998	23,970	2,746	21,224

Notes: The number of referrals does not necessarily correlate to the number of persons since a person can be referred more than once during a fiscal year. The decline in the number of referrals screened by the CRU from FY 1996 to FY 1997 is a result of policy changes regarding post admission screening.

In fiscal year 1998, the major sources of referrals were nursing facilities, hospitals and in-home care providers. The proportions of referrals by source have remained relatively constant the last several years.

Other	141	140	424	238	236
TOTAL	16,340	18,150	19,603	21,752	23,970

During fiscal year 1998, almost half of the persons referred for screening chose or required nursing facility care; another seven percent entered a nursing facility on a short-term basis. Over one-third of those referred chose home & community services or personal care in an RCF. Ten percent did not receive MCO services. (See Appendix, pages 18-21, for outcome information by county and region.)

Medicaid Long-Term Care

Medicaid long-term care reimbursements have been increasing at a declining rate since fiscal year 1996. Total costs increased 12.5 percent in fiscal year 1998, down from the 16 percent and 25 percent increases in fiscal years 1997 and 1996, respectively. As more people have chosen alternatives to nursing facility long-term care, the proportion of long-term care dollars spent on home & community services has increased two and one-half percent since fiscal year 1994.

Medicaid reimbursement for long-term care includes payments for Division of Aging Home & Community Services clients as well as persons not screened by the Division of Aging. Also, not all clients were screened through the MCO program because of becoming clients prior to the program's inception. Therefore, the numbers in the table below represent MCO and non-MCO clients.

Medicaid Long-Term Care Reimbursements

* Includes RCF Medicaid costs but not general revenue cash grants.

** Adjusted for the Federal Reimbursement Allowance for fiscal years 1995 through 1998.

Medicaid Long-Term Care Costs

The number of Medicaid nursing facility reimbursed days and the number of Medicaid nursing facility residents has remained steady over the past five years while home & community services has seen continual increases. For fiscal year 1998, the monthly number of nursing facility residents averaged 26,383; home & community service clients averaged 25,539 per month.
